Backend: Elixir, Phoenix, LiveView, Node.js, NestJS, Express.js, PHP, Laravel

APIs & Data: REST, GraphQL, WebSockets, PostgreSQL, MySQL, MongoDB

Testing: Jest, ExUnit

DevOps & Cloud: Docker, Git, GitHub Actions, AWS, GCP, DigitalOcean

Professional Experience

Vargent Africa — Senior Full-stack Software Engineer | Sep 2024 – Dec 2025

Tech: React.js • NestJS • PostgreSQL • Docker

- Led frontend development of a cross-border money transfer platform, translating product requirements into responsive user experiences.
- Built reusable React.js components and integrated frontend workflows with backend APIs for payments and transaction management.
- Implemented real-time transaction status updates and delivered reliable end-to-end features.
- Collaborated with stakeholders and product teams to simplify complex financial workflows.

Candidately — Senior Full-stack Engineer (Consultant) | Aug 2023 – Jul 2024

Tech: React.js • TypeScript • Elixir • Phoenix • OpenAI

- Built and maintained customer-facing features using React.js and TypeScript alongside Elixir/Phoenix services.
- Implemented OpenAI Assistant streaming to improve real-time interactions and user experience.

- Developed event reporting features that improved product visibility and decision-making.
- Collaborated with product and engineering teams to deliver production features.

Banking Innovation Through Technology (BITT) — Software Engineer | Mar 2022 – Dec 2022

Tech: JavaScript • React • Elixir • PostgreSQL

- Contributed to a Central Bank Digital Currency platform serving financial institutions, consumers, and merchants.
- Built user-facing features and data visualizations for operational and business insights.
- Used SQL to query and aggregate data for metrics and reporting.

Stanbic IBTC Bank — Mobile Engineer | Jun 2021 – Feb 2022

Tech: React Native • JavaScript • APIs

- Implemented the Stanbic IBTC Stockbrokers Limited feature in the mobile application.
- Maintained and enhanced mobile features with focus on performance, stability, and user experience.
- Integrated third-party APIs and services.

Farmcrowdy — Software Developer | Nov 2017 – Jun 2021

Tech: React.js • Elixir/Phoenix • WebSockets

- Contributed to a digital agriculture crowdfunding platform serving a network of over 400,000 farmers.
- Built and maintained web application features and APIs using Elixir/Phoenix.
- Implemented real-time business metrics and visualizations using WebSockets.

Education

B.Eng. Chemical Engineering — University of Benin, Nigeria | 2014
